22 years of life-experience

I have drive and am not scared of development. When I am not with my family, running or in school, I work on Planio, that shows my skills and my ability to stand for my work. You can rest assured that you will get a colleague with a big potential, who is motivated to work for the company, and embraces challenges.

Education

2022 - 2024 **Multimediedesign, EAAA, Viby (current)**

- Further education, where I in 3. semester have chosen Frontend development. On the school we have been taught programming, design, and UX-content.
 - React
 - HTML, CSS & JavaScript
 - API's
 - SoMe
 - Target group description
 - UX/copywriting
 - User tests
 - User needs
 - User goals
 - Business goals
 - Design rules
 - Project management

2018 - 2021 **Paderup Gymnasium, STX, Randers**

- Social studies A, Math A, Media studies (movies) C

2017 - 2018 **Hald Ege Efterskole, 10th class, Viborg**

- Movies as elective.

Work experience

2023 **Liebe Nordic, Viby (current)**

- In Liebe Nordic I have been given responsibility from the start. I work with E-mail marketing and adaptation together with improvement of the webpage. It is a relatively new company, and I will get even more practice in self-learning and problem solving.

2022 **Anne's Frokost & Sandwich, Odder (current)**

- In Anne's there has been focus on customer contact and leaving the customers with a smile. I could prove again, that with the right, visual training can turn disadvantages in terms of cooking to strengths. It has also improved my social skills.

**2019 - 2022 Netto, 1. assistant, Aarhusvej, Randers**

- Even though I turned 18, I was allowed to say in Netto. My boss had faith in me that I could take more responsibility in terms of new assignments and areas - and have the responsibility for the store in the evening. I got the opportunity to show that I was the right choice and I love to develop.

2018 - 2019 Netto, young worker, Marsvej / Aarhusvej, Randers

- After 10th class they asked me to come back - I was an obvious choice. And I stayed in Netto when they moved to Aarhusvej.

2017 - 2017 Netto, young worker, Marsvej, Randers

- With no work experience I got a job in Netto. My personality was enough to get me hired and get the foot into industry of work. I was fast to prove that I left the customers with a smile and was able to complete the assignments with quality.

It-experience

Daily user Expo React Native

- I develop Planio with self-taught skills, which proves that I can make my dreams come alive.
 - Targeted design based on target group description
 - Changes based on user tests
 - Firebase Authentication & Real Time Database
 - React Native Async Storage
 - Redux
 - Multi language
 - Adding the app to Google Play Store
 - API's
 - Onboarding of new users
 - Encryption and decryption with React Native CryptoJS
 - Integration with React Native Paper
 - Debugging code errors
 - Adobe XD
 - Later Tailwind (web-version)

New user React, Vite & Tailwind

- My portfolio is created with React, Vite and partly Tailwind. The same goes with Planio Web-version.

Daily user Adobe XD & Figma

- I have used Adobe XD or Figma for my projects in the free time and the projects in the school.

Daily user SoMe

- I have had multiple YouTube channels, and on EAAA we have been taught in SoMe. Therefore, SoMe is not unknown to me. I am not shy behind a camera either.

**Former user After Effects**

- As an early teenager I worked in After Effects for many years. I already had drive and the skill to learn new things self-taught.

Top-5 personal qualities

Motivated

- You can rest assured that I am motivated to work for you. I have applied to you, because I see huge potential in our collaboration and my opportunity to shine.

Digital mindset

- I love the digital and its (current and future) possibilities – both in the personal and the professional aspect.

Goal oriented

- I refuse to give up and will work hard to make it work – no matter how many times it may fail.

Drive

- I am ready for new challenges and have the will and quality to evolve. New problems will be met with motivation.

Huge potential

- With good visual training combined with personal training, and the ability to ask for help, am I far from my final potential. Feedback and constructive criticism will only speed up that progress.
