## 22 years of life-experience

I have drive and am not scared of development. When I am not with my family, running or in school, I work on Planio, that shows my skills and my ability to stand for my work. You can rest assured that you will get a colleague with a big potential, who is motivated to work for the company, and embraces challenges.

## Education

---

### 2022 - 2024    **Multimediedesign, EAAA, Viby (current)**

- Further education, where I in 3. semester have chosen Frontend development. On the school we have been taught programming, design, and UX-content.
  - React
  - HTML, CSS & JavaScript
  - API's
  - SoMe
  - Target group description
  - UX/copywriting
  - User tests
  - User needs
  - User goals
  - Business goals
  - Design rules
  - Project management

### 2018 - 2021    **Paderup Gymnasium, STX, Randers**

- Social studies A, Math A, Media studies (movies) C

### 2017 - 2018    **Hald Ege Efterskole, 10<sup>th</sup> class, Viborg**

- Movies as elective.

## Work experience

---

### 2022    **Anne's Frokost & Sandwich, Odder (current)**

- In Anne's there has been focus on customer contact and leaving the customers with a smile. I could prove again, that with the right, visual training can turn disadvantages in terms of cooking to strengths. It has also improved my social skills.

### 2019 - 2022    **Netto, 1. assistant, Aarhusvej, Randers**

- Even though I turned 18, I was allowed to say in Netto. My boss had faith in me that I could take more responsibility in terms of new assignments and areas - and have the responsibility for the store in the evening. I got the opportunity to show that I was the right choice and I love to develop.

2018 - 2019    **Netto, young worker, Marsvej / Aarhusvej, Randers**

- After 10th class they asked me to come back - I was an obvious choice. And I stayed in Netto when they moved to Aarhusvej.

2017 - 2017    **Netto, young worker, Marsvej, Randers**

- With no work experience I got a job in Netto. My personality was enough to get me hired and get the foot into industry of work. I was fast to prove that I left the customers with a smile and was able to complete the assignments with quality.

## It-experience

---

**Daily user      Expo React Native**

- I develop Planio with self-taught skills, which proves that I can make my dreams come alive.
  - Targeted design based on target group description
  - Changes based on user tests
  - Firebase Authentication & Real Time Database
  - React Native Async Storage
  - Redux
  - Multi language
  - Adding the app to Google Play Store
  - API's
  - Onboarding of new users
  - Encryption and decryption with React Native CryptoJS
  - Integration with React Native Paper
  - Debugging code errors
  - Adobe XD
  - Later Tailwind (web-version)

**New user      React, Vite & Tailwind**

- My portfolio is created with React, Vite and partly Tailwind. The same goes with Planio Web-version.

**Daily user      Adobe XD & Figma**

- I have used Adobe XD or Figma for my projects in the free time and the projects in the school.

**Daily user      SoMe**

- I have had multiple YouTube channels, and on EAAA we have been taught in SoMe. Therefore, SoMe is not unknown to me. I am not shy behind a camera either.

**Former user    After Effects**

- As an early teenager I worked in After Effects for many years. I already had drive and the skill to learn new things self-taught.

## Personal qualities

---

### Motivated

- You can rest assured that I will be motivated to work for you.

### Digital mindset

- I love the digital, and its possibilities - both in the personal and professional aspect.

### Goal oriented

- I don't give up and will work wholeheartedly to make it work - no matter how many times it may fail.

### Drive

- I love you challenges and have the will to change for the better.

### Loved by colleagues

- My colleagues are happy for me - you'll be too.

### Smiling

- You come a long way with a smile and high spirits.

### Big potential

- I can't do everything from the beginning, but with good, visual, training and the possibility to ask for help, I have a big potential.

### Good collaboration skills

- A lot of tasks are best completed in groups - and that is totally fine.

### Independent

- I can work alone - if I can ask for help when I need it.

### Responsible- and quality conscious

- I always do my best - and thrive to create quality under responsibility.

### Taking part in social activities

- I am no party-ape, but I love the company of others.

### Quick learner

- Few things are easy, and I don't give up before I have learned it. Often there is not much needed.

### Love praise and constructive criticism

- I learn and evolve the most when I get praise and especially constructive criticism.

### Love routines

- If you have fixed routines, it is a plus, but changes are no problem either.
